

REPRODUCTIVE MEDICINE AND NEW BUSINESS OPPORTUNITIES

ReproUnion Super Session at Nordic Life Science Days 2018

September 12th, 2018, 9:45 – 10:45

This Super Session gathers top experts from the pharmaceutical and private fertility industry who will discuss the business and the industries perspective on reproductive medicine.

Every 12th child is conceived in a fertility clinic. 16-25 % of couples that try to get pregnant have fertility problems. The birth rate has fallen drastically over the past 50 years and most countries have fertility rate of less than 1,5 children per woman. The combination of demographic development and the low fertility rates demands new solutions and services. This development creates new business opportunities for the private fertility sector.

ReproUnion is a cross border collaboration between Sweden and Denmark within the area of reproductive medicine. The collaborative network consists of 14 clinical and research units within the Capital Region of Denmark, Region Zealand of Denmark and Region Skåne in Southern Sweden.

SPEAKERS: Dr. Stig Jørgensen - Program Director of ReproUnion, Dr. Marcel Van Duin - VP, Head Reproductive Health & Endocrinology Research of Ferring Pharmaceuticals & Dr. Rita Vassena - Scientific Director of Eugin, Executive Member of ESHRE

VENUE: Stockholm Waterfront Congress Center, Nils Ericsons Plan 4, 111 64 Stockholm
